EDUCATION
ACADEMLO

Full Stack Web Developer
- **Front-End Web Developer Certificate Certificate of Fundamentals of HTML, CSS and JavaScript web development.**

Dev/Talles
- **React-Native**

Skills
- **Responsive layout of websites**
- **Consumption of API's**

Achievements
- **Total presentation of the projects and challenges**

Derian Augusto Arias Ballesteros from 🇨🇴

Front-End Web Development

MAIN PROJECTS

E-commerce React

Example projects - React E-commerce (Enero, 2023)
- **Responsive design.**
- **Apply programming logic reading documentation to give all the functionality to e-commerce.**
- **The site met all the expectations of the requests.**

E-commerce JavaScript

- **Complete simulation of a sales website (February, 2022)
I managed to consume API's, perform the logic of functional, give CSS styles.
I worked with other programmers on the same repository via GitHub where we were able to**
- **understand each other perfectly having an excellent atmosphere.
I had the opportunity to advise other colleagues in your projects and help fix bugs**

General knowledge

Knowledge; Google Ads, Facebook Ads. Domain of Adobe Premier tools, Adobe Illustration, editing programs, digital advertising, data analysis

Carry out advertising campaigns on Facebook, Google, as well as create and manage your social networks. Still carrying high exponential growth, in its own electronic commerce.

I learned Adobe Photoshop and Adobe Illustrator technologies, with which I made advertising flyers.

All this taking advantage of my ability to learn and take on new challenges.

📢 OTHER PROJECTS

Marketing Digital Tactico MD

Marketing Digital Tactico MD
Title in digital advertising on the platforms of Facebook ads, Google ads, management of massive data, Marketing by emails, SMS (November 2019)

Pokemon and Rick and Morty search website

Project carried out to strengthen knowledge in consuming APIs, layout, protected routes and global states with Redux (February, 2023)
I managed to add the dark-mode, using variables in the CSS stylesheet.
I had the opportunity to advise other colleagues on their projects and help solve

Mistakes

Website where users

Website where users can be created, edited and deleted (February 2023)

For this project I used APIs, with different endpoints, which together with the axios library and the GET

methods, POST, UPDATE and DELETE functionality was given to get, add, edit and delete users. Thanks to

everything I learned in this project I had good tools to develop many other projects

E-commerce with basic concepts of web development

Website that imitates an online clothing store (January, 2023)

I had the opportunity to carry out the project using only basic programming concepts such as

HTML, CSS and JavaScript, which helped me to reinforce knowledge.
The responsive layout was a challenge; however, I managed to do it by adding programming logic to create animations with clean CSS

Weather App

Website that imitates an online clothing store (January, 2023).

A weather web application using React Hooks and OpenWeather API

An application is created that measures the temperature in heat, wind, cold, in real time of the current location of the user. It was possible to carry out with the React library, consumption of Api's, DOM management, LocalStorage
